Professional Summary

Junior Software Developer with experience in Python and JavaScript, skilled in writing clean, testable code and debugging. Familiar with web technologies including HTML, CSS, and version control using Git and GitHub. Strong communicator with a collaborative mindset, eager to learn and grow through mentorship in an agile environment.

Experience

Outlier, Generalist AI Trainer, Remote

- Evaluate large language model outputs using structured rubrics and quality standards.
- Analyze multi-step AI agent workflows, including reasoning traces and response chains, to assess accuracy, completeness, and logical consistency.
- Identify recurring failure patterns, hallucinations, and edge cases to improve model reliability.
- Provide structured, actionable feedback to support model refinement and performance optimization.
- Maintain scoring consistency across evolving evaluation frameworks and ambiguous scenarios.
- Contribute to calibration alignment by applying consistent judgment and quality benchmarks.

Freelance, Web Developer, Remote

Jan 2022 - Jan 2025

- Build responsive, user-centered web applications using React, JavaScript, and modern front-end frameworks.
- Integrate third-party APIs and automate dynamic content workflows.
- Conduct debugging, QA testing, and performance optimization.
- Gather client requirements and translate them into scalable technical solutions.

CodSoft, Web Development Intern

Feb 2025 - Mar 2025

- Developed three responsive web applications using React and JavaScript.
- Applied debugging techniques and deployment best practices.
- Strengthened structured problem-solving and testing methodologies.

Lynne Dalbeck Medical Transcription Service, Medical Transcriptionist

Dec 2021 - Apr 2024

- Transcribed complex medical dictations with high accuracy and strict attention to detail.
- Maintained confidentiality and adhered to data privacy regulations.
- Demonstrated independent work ethic in a fast-paced remote environment.
- Ensured precision in terminology, formatting, and documentation standards.

Education

Bow Valley College, Diploma in Business

Courses

SheCodes, Web Development Certification

Jul 2026

- Intensive 6-month program focused on front-end and back-end development.

Skills

Programming Languages: Python, JavaScript

Web Development: HTML, CSS, React basics

Version Control: Git, GitHub

Debugging and Bug Fixing: Issue diagnosis

Testing: Unit and integration tests

Agile Methodologies: Sprint participation

Technical Communication: Clear feedback
