PROFESSIONAL SUMMARY

AI Evaluation Specialist and Junior Developer transitioning from medical transcription into technology, bringing 99% transcription accuracy, documentation discipline, confidentiality, and remote work experience. Evaluated 50+ AI outputs using structured rubrics for accuracy, logic, safety, completeness, and quality. Developed 20+ responsive websites/web applications and completed 3 internship projects, combining front-end development, debugging, QA, project management, and business communications to support reliable technical work and clear documentation.

TECHNICAL SKILLS

Programming:	Python, JavaScript
Web Development:	HTML, CSS, React basics, responsive design, APIs
Tools:	Git, GitHub, VS Code, Chrome DevTools, Netlify
Testing & Debugging:	Issue diagnosis, console testing, QA checks, unit and integration testing basics
AI Evaluation:	Rubric-based scoring, hallucination detection, quality feedback, calibration alignment
Communication:	Technical documentation, client requirements, clear written feedback

EXPERIENCE

Outlier - Generalist AI Trainer, Remote	<i>Sep 2025 - Current</i>
- Evaluated large language model outputs using structured rubrics for accuracy, completeness, logic, safety, and overall quality. - Analyzed multi-step AI agent workflows, reasoning traces, and response chains to assess consistency and task completion. - Identified hallucinations, recurring failure patterns, edge cases, and unclear instructions to improve model reliability. - Provided structured, actionable feedback that supported model refinement, evaluator alignment, and performance optimization. - Maintained scoring consistency across evolving frameworks, ambiguous scenarios, and calibration expectations.	
Freelance Web Developer and Consultant, Remote	<i>Jan 2022 - Jan 2025</i>
- Developed 20+ responsive, user-centered websites and web applications using HTML, CSS, JavaScript, React, APIs, Git, and GitHub. - Integrated third-party APIs to support dynamic content, interactive features, and improved user functionality. - Reduced front-end bug resolution time by 20% by using Chrome DevTools, console testing, and structured QA to diagnose layout, responsiveness, JavaScript, and API issues more efficiently. - Performed QA checks across screen sizes and browsers to improve usability, accessibility, and overall site consistency. - Gathered client and project requirements and translated them into organized, scalable front-end solutions.	
CodSoft - Web Development Intern	<i>Feb 2025 - Mar 2025</i>
- Spearheaded the development of 3 responsive web applications during a 30-day internship using HTML, CSS, JavaScript, React, and deployment best practices. - Applied structured debugging techniques, testing workflows, and version control practices to strengthen project quality. - Improved problem-solving skills by building complete front-end projects from requirements through implementation and deployment.	
Lynne Dalbeck Medical Transcription Service - Medical Transcriptionist	<i>Dec 2021 - Apr 2024</i>
- Achieved a transcription accuracy rate of 99% while maintaining formatting consistency and attention to medical terminology. - Leveraged strong attention to detail and confidentiality standards while managing sensitive medical documentation and data privacy expectations. - Managed high-volume remote documentation workflows while reviewing complex transcripts for accuracy, grammar, formatting, terminology, confidentiality, and compliance.	

EDUCATION

Bow Valley College - Diploma in Business

- Relevant coursework: Project Management, Computer Applications, Business Communications, and Introduction to Management.
- Applied business training to project coordination, professional documentation, workflow organization, stakeholder communication, and digital tool use.

SheCodes - Web Development Certification

Jul 2026

- Intensive 6-month program focused on HTML, CSS, JavaScript, React, Python, APIs, debugging, Git/GitHub, and responsive web development.
